

# China Doctoral Dissertations/ Masters' Theses Full-text Database

The most comprehensive, high-quality,  
continuously-updated dissertation database in China

## Resources & Functions

- Includes **484,000** doctoral dissertations from **508** PhD granting institutions and **4.5 million** masters' theses from **788** master granting institutions since 1984, covering **100%** of the National Key Universities.
- The exclusive doctoral degree granting institutions account for **40%** and the master's degree **57%**.
- Covers all the disciplines such as basic science, engineering science and technology, agriculture, medicine, philosophy, humanities and social science.
- Published 1.5 months after the degrees are granted and at least 10 months earlier than other similar products.

## Value

### • Informative and Systematic Content

A thesis or dissertation generally presents the research results completed in 3 to 5 years under the guidance and review of the supervisor. It explores the problems in a detailed and systematic way, including detailed experimental methods, statistical analysis methods, experimental results, original data and systematic analysis, etc.

### • Professional and Practical Value

A thesis or dissertation shows the scientific research level of a young scholar in a certain discipline. It is innovative and groundbreaking in theory, since the topic, normally selected based on the research topic and direction of the supervisor, reflects the hot issues or frontier problem that needs to be urgently solved in the discipline.

### • Comprehensive and Abundant References

A thesis or dissertation usually refers to a large number of domestic and foreign documents and collects lots of relevant thematic literature in the process of topic selection and writing, which is helpful to track and retrieve the relevant literature.
