

Conference Proceedings Databases

Resource Coverage

The resources mainly target at important conferences held by institutions within the system of China Association for Science and Technology, by national first or secondary-class societies, associations, universities, research institutes, or by government agencies. They also include output from important international conferences which have taken place in China or abroad since 1999. Some key conference proceedings date back to 1953. At present, there are more than 41,000 domestic and international conferences with a total literature of more than 3 million.

China Proceedings of Conference Full-text Database (CPCD)

Literature Features: Proceedings mainly include output from important conferences held by institutions within the system of China Association for Science and Technology and Federation of Social Science Circles, by provincial level and above societies, associations, universities, research institutes, or by government agencies, etc.. Among them, more than 80% are national conference literature.

International Proceedings of Conference Full-text Database (IPFD)

Literature Features: Focus on the literature published at international conferences held in China or abroad by institutions within the system of China Association for Science and Technology and other important conference organizers.

Resource Features

• **TIME-EFFICIENT:** CNKI Conference Proceedings Databases timely and comprehensively collect conference papers from different industries and areas. They offer the latest scientific achievements and information from research frontiers. They follow social hot spots & scientific research trends closely.

China Management Annual Conference is the Largest and Highest-level Comprehensive Academic Conference in the Field

5G Network Innovation, Co-sponsored by TD Industry Alliance and Mobile Communications Magazine

China Water Conservancy Academic Conference, Focusing on Each Year's Water-related Top Issues

• **PROFESSIONAL:** Conference organizers are national or international authoritative professional organizations. High-quality keynote speeches and conference reports are collected. Many valuable papers and reports are contributed by well-known scholars, including numerous academicians from Chinese Academy of Sciences (CAS) and Chinese Academy of Engineering (CAE), even Nobel Laureates.

In Cooperation with Authoritative and Professional Organizations in Various Industries and Fields

- **CONSISTENT:** The databases consistently collect proceedings of continuous conferences.

Navigation Functions

- Knowledge Network Node:

In addition to an article's basic information, readers can also extend all related knowledge of different literature types through the unique knowledge network system of CNKI platform: For example, track the evolution and development direction of research topics through the "Subject Tree" module; Track all associated cited and citing documents through the "Citation Network" module.
